

PROBIO ODOR ELIMINATOR**SPRAY FOR ENVIRONMENT AND SURFACES**

Odor neutralizer in a 500ml spray format, ideal for application in both environments and surfaces. This product combines multiple technologies to effectively neutralize unpleasant odors, leaving a more pleasant and healthier environment.

Operation and Composition

Our odor eliminators are of organic origin and biodegradable, this, environmentally safe. Furthermore, they are entirely safe for human health and our pets. This makes them highly versatile products suitable for various applications.

Moreover, they don't mask the odor by covering it with another fragrance; instead, they directly capture the molecule causing the bad odor and make it disappear from the air.

This effectively eliminates the unpleasant smell from the treated environment or surface.

Applications

At Proandre, we've developed various formats to adapt our products to our customers' needs. This particular format allows applications in both environments and surfaces, ideal for eliminating odor-causing particles in the air as well as their source.

These are broad-spectrum odor neutralizers that eliminate odors from nitrogenous compounds, sulfur, and acids.

They are suitable for treating odors emitted from sources such as garbage, toilets, tobacco, sewers, containers, pipes, pets, etc. It can be used in environments with human or animal presence.

Physicochemical Characteristics

- Appearance: Liquid
- Color: Colorless - Translucent
- Odor: Characteristic (Slightly Citrusy)
- Density: 0.950 - 1.00 g/ml
- pH: Approx. 7.0
